

## TRACING YOUR FEET

Now that you've completed your order, it's time to trace your feet so that we can get started on making your GladSoles.

1. First make a ruler mark for scale – this is so we can be sure the sizing is perfect. Draw a straight line on the tracing sheet, and mark it at 1" intervals.
2. Place your foot diagonally on the tracing sheet.
3. Take a pen or pencil and trace a line all around the perimeter of your foot, keeping the pen or pencil perpendicular to your foot.
4. Make a mark between your big and second toe.
5. Make a mark just in front of your ankle bone.
6. Write your name on the tracings, as well as the colors of laces and locks you'd like.

A sample tracing is attached so you can see how it should look.

Once the tracings are completed, scan them and email them to us at:

[tracings@gladsoles.com](mailto:tracings@gladsoles.com)

Or, send them by regular mail to:
